

# DAYA BHARADA

ANGULAR DEVELOPER

email:bharadadaya@gmail.com

phone: +91 9924171731

## SKILLS & EXPERTISE

- **HTML5** : Web Markup
- **CSS3** : Style Sheets
- **Bootstrap** : UI Framework
- **jQuery** : JavaScript Library
- **Angular Web Designing** : Web Framework
- **Rest API** : Integration
- **RxJS**
- **Unit Test (Karma)**
- **NestJS**
- **BitBucket**
- **Spring Boot**
- **Git**
- **Web Socket**
- **MongoDB**
- **Micro Service**
- **Rabbit MQ**

## EDUCATION

### Master Of Science (IT)

2022 - Running

### Bachelor Of Science(IT)

2019 - 2022

## PROFILE

I am driven by a profound enthusiasm for continuous growth and learning, and I am earnestly seeking an opportunity to be part of an organization that shares these values. My goal is to join a dynamic team that embraces the ever-evolving landscape of technology, offering me the chance to constantly update my knowledge and skills in line with the latest trends and innovations. I believe in the power of staying ahead in the fast-paced world of technology and contributing effectively to an organization's success by harnessing the full potential of emerging technologies.

## WORK EXPERIENCE

### Jr. Software Engineer

Techrover Solutions

July- 2022 - Present

- **Angular Development** : Design and maintain web applications with Angular, ensuring dynamic and responsive user interfaces.
- **REST API Integration** : Seamlessly connect frontend and backend systems via REST APIs for efficient data exchange..
- **Enhanced User Experiences** : Improve user satisfaction by creating intuitive, user-friendly interfaces.
- **Data Management** : Retrieve, process, and display data effectively within the application.
- **Collaboration** : Work closely with cross-functional teams, including backend developers and designers, to deliver high-quality web applications.
- **Component-Based Architecture**: Implement and manage Angular's component-based architecture to create reusable and modular frontend elements, streamlining development and maintenance.
- **Routing and Navigation**: Utilize Angular's routing and navigation capabilities to create seamless transitions between views, ensuring a smooth user experience within single-page applications.
- **State Management** : Implement state management solutions, such as NgRx, to efficiently handle application state and data flow, improving performance and maintainability.
- **Third-Party Integration**: Integrate third-party libraries, APIs, and services into Angular applications to extend functionality and leverage external resources.
- **Version Control and Collaboration Tools**: Use Git for version control and collaborate effectively with development teams using tools like GitHub or GitLab.

## PROJECTS

- **CollateralEdge** : Leveraged Angular to create dynamic user interfaces and ensure efficient data exchange through REST APIs, empowering banks to efficiently increase commercial lending capacity while maintaining credit quality.(01/2023 - Present)

## WORK EXPERIENCE

### Trainee Software Developer

Techrover Solutions

January 2022 - July 2022

- Acquired expertise in Angular CLI for frontend development.
- Gained proficiency in Nest JS, a backend framework for building scalable applications.
- Developed a strong command over TypeScript, enhancing code quality and maintainability.
- Conducted routine project status meetings, delivering updates and facilitating decisions.
- Learned unit testing techniques to ensure the reliability and robustness of applications.Collaborated closely with cross-functional teams, fostering strong communication channels for project efficiency and quality.
- Equipped with skills to build modern web applications, spanning both frontend and backend, while maintaining code quality and integrity.
